

Breast Imaging

Annual mammograms are important for your breast health. It is equally important to also find a trusted partner that provides high-quality breast imaging and care. As the only National Cancer Institute-designated comprehensive cancer center in Orange County, UCI Health offers several state-of-the-art options for comprehensive, accurate breast imaging, including 3D tomosynthesis mammography, breast MRI and breast ultrasound.

Schedule your breast imaging with us

Call 714-456-RADS (7237) or visit ucihealth.org/mychart to schedule select services, including breast mammography and DEXA, through our MyChart patient portal.

Breast Imaging Experts

UCI Health offers a dedicated breast imaging radiology team, who will expertly read your breast imaging. Our devoted and compassionate breast care specialists will also work with you to determine the best screening approach.
